- Database Fundamentals
- Fundamentals With C

Some Projects

- My Portfolio

[Demo](#)

[GitHub Repo](#)

it's my beast project, Dynamic Portfolio website with (HTML, CSS, JS) it was an enjoyable website I've been learned many things from it. you can edit its color, and it Has A Dark Mode Feature. and it was my first time using ChatGPT to get more solutions to many bugs and get more ideas. the application is responsive across all screen sizes.

- CRUDS

[Demo](#)

[GitHub Repo](#)

Commodity management system by JS to save all Commodity data. This app Based on CRUD Operations (create, read, update and delete) and "s" for search, so Here I have dealt with Ajax and the user local storage.

- Editor

[Demo](#)

[GitHub Repo](#)

Photos Editor app with 7 photo filters, it's responsive across all screen sizes whit the CSS styles grid and flex.

- Boat trip

[Demo](#)

[GitHub Repo](#)

Boat trip is a website for a boat travelling company, it has a transform to show a good animation work while you scroll.
